

ANTIFREEZE (100% Concentrate)

Description : Universal antifreeze (100% concentrate) on basis of mono-ethylene-glycol and inhibitors.

Application : Especially for use in automobile radiators. In cooling systems of practically all vehicles. For using this product, it's necessary to rinse the system and to clean (to rinse) with water. Also for systems of cooling of stationary engines.

Properties :

- Contains additives against the formation of rust and deposits.
- Protection against freezing of the cooling system.
- 1 out of 3 gives a protection until -12° C.

Typical analyses :

Density at 15°C	1,100	Color	Transparant
pH 50% vol.	7-8	Initial Cristallisation °C	-50°C

These values are given as an indication, it acts of average values.
