

## LITHIUM GREASE EP NLGI 2

**Description :** High quality grease, manufactured on basis of lithium soap with “Extreme Pressure” additives for severe operating conditions in industrial & automotive applications.

**Application :** A universal grease with application temperatures from – 20° C to 140° C. Lithium grease EP 2 is to be applied where a grease EP is prescribed or for the lubrication of parts subjected to strong loads such as the bearings and heavily charged smooth bearings.

### **Properties :**

- A large mechanical shear stability.
- Anti-oxidation.
- Good water resistance.
- Good behavior on a broad beach of application temperatures.
- Very strong adherence to metal surfaces.
- A protection of surfaces against corrosion.

### **Typical analyses :**

Soap type	Lithium	Color	Amber
Dropping point °C	185 °C	Application °C	-20°C / 140°C
Penetration 25° C	265/295	Aspect	Smooth

These values are given as an indication, it acts of average values.
