

BRAKE FLUID HD DOT 3

Description : A 100% synthetic fluid for the brake systems of vehicles.

Application : Intended for the circuits of drum, disc brakes and clutches of vehicles.

Specifications :

- DOT 3
- SAE J 1703
- ISO 4925

Properties :

- Excellent protection against rust and oxidation.
- Can be used during all year.
- High boiling point.
- Miscible with other brake fluids of the same quality

Typical analyses :

Density at 20°C	1,100	Color	Transparant
Boiling point sec °C	Min. 210 °C	Pour point °C	< -50°C
Flash point °C	148		

These values are given as an indication, it acts of average values.
